- Marine Engineering Technology

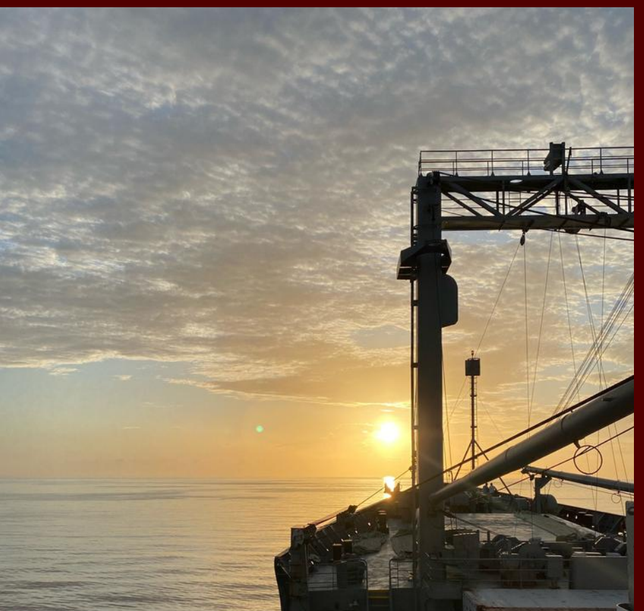

Any Masters Degree

Summer Sea Term

To become licensed officers in the Merchant Marine, cadets must fulfill academic and sea service requirements aboard vessels. This training is provided during the summer between the spring and fall academic sessions.

Commercial Sea Term

Commercial Sea Term is an opportunity to sail aboard a commercial vessel, similar to an internship. This sea term would be in lieu of the Training Ship in the summer after your Sophomore year and has a separate academic project tailored to the type of vessel on which the cadet sails.

Cadets are selected for commercial opportunities through a competitive application process. Cadets not selected for a Commercial Sea Term will sail on the training ship that Summer Sea Term.
